The CloudMesh Satellite (NS-02) works wirelessly with a CloudMesh Gateway (NF20MESH), forming a single powerful Whole Home Wi-Fi Mesh network coverage.

**WI-FI 6 IS HERE**

Wi-Fi 6 is the next generation of Wi-Fi. Delivering significant speed, performance and efficiency improvements, it provides up to four times more device capacity than Wi-Fi 5. These improvements enable end users to stream higher quality with more devices on the network, while still operating at optimal performance. Your Wi-Fi 6 Gateway will future-proof your Wi-Fi experience, and enable smart devices throughout your modern, connected home.

**WI-FI AUTOPILOT**

Every CloudMesh Satellite includes the CloudMesh Wi-Fi AutoPilot. The Wi-Fi AutoPilot constantly scans and analyses the end-user Wi-Fi environment. If any detrimental changes are detected, the AutoPilot adjusts the Satellite’s Wi-Fi parameters. Any action taken is based on a patented and weighted algorithm, ensuring that the internet connection experience is not compromised. It ensures that every Wi-Fi client device is connected on the best possible channel, using the fastest available band, at the perfect RF power level and at the closest Wi-Fi access point.

**WORKS WIRELESSLY WITH THE NF20MESH**

The CloudMesh Satellite (NS-02) works wirelessly with the CloudMesh Gateway (NF20MESH), forming a single powerful Whole Home Wi-Fi Mesh network with all the control and settings centralized on the gateway. The gateway becomes the Wi-Fi Mesh master node and Wi-Fi client devices roam seamlessly between the satellites and the gateway.
